Utkarsh Gauniyal

Full Stack Developer with expertise in Django, Springboot, Reactjs, Vue.js, and SQL

Delhi, India

Summary

A dedicated professional with a B.Tech degree in Electronics and Communication Engineering from GGSIPU, offering a strong foundation in technical expertise.

Committed to the field of software development, with a profound enthusiasm for staying at the forefront of emerging technologies and contributing to innovative projects.

_____

Experience

Tech Mahindra

Software Engineer

March 2024 - Present (3 months)

Bengaluru, Karnataka, India

Urban Company

Data Analyst

January 2024 - March 2024 (3 months)

Gurugram, Haryana, India

• Conducted comprehensive data analysis across multiple service categories for Urban Company's hubs and deployed Redash and PowerBI dashboards to augment operational insights, leading to a 20% surge in productivity and a 15% increase in revenue through optimized recruitment processes across India.

• Orchestrated the development of Excel-based dashboards to monitor operational efficiency in diverse hubs; enabled rapid and intuitive assessment of work performance, leading to a 30% reduction in operational costs in targeted areas.

• Designed and implemented automated data collection processes using SQL queries, optimizing the efficiency of data retrieval and contributing to a more streamlined data analysis workflow.

• Conducted regular audits using SQL to ensure data integrity and consistency across various datasets, implementing corrective measures as needed to maintain high-quality data standards.

Neolen
Back End Developer
August 2021 - October 2021 (3 months)

• Architected an Olympiad Web Application using Django and Vue.js, designed for nationwide utilization, leading to a 40% increase in user registration and a 25% rise in user engagement. Employed PostgreSQL for efficient data storage and retrieval, reducing query response time by 50%.
• Engineered a Quiz Application employing Django and AJAX, which served as a practice platform for Olympiad participants.
• Utilized Selenium for web scraping to collect data from online sources, facilitating its integration into a Cricket Prediction Application.

The Tarzan Way
Content Writer
April 2020 - May 2020 (2 months)
Delhi, India

Google
Google Code-in
December 2017 - January 2018 (2 months)

• Developed and rigorously tested npm packages, ensuring cross-compatibility across various operating systems and environments.
• Gained valuable insights into Open Source Software (OSS) ecosystems, expanding knowledge and skills in collaborative development practices.
